

Anti-Sitting Module

The anti-sitting module is both stylish and robust. Made from 316L stainless steel, it withstands all weather conditions, resists corrosion perfectly, and requires no maintenance. The anti-sitting module restricts access to areas that are accessible but potentially dangerous. Its original design allows it to fit into all spaces and locations.

Characteristics:

- Made from 316L stainless steel
- Excellent resistance to abrasion and UV rays
- Quick and easy fixing with anchor rods
- Threaded rods for better grip
- Optional thermosetting coating, with RAL color choices.

Dimensions :

- Length: 1000 mm
- Width: 120 mm
- Height when installed: 85 mm
- Number of rods: 6
- Rod length: 75 mm
- Rod diameter: 8 mm

Installation:

Quick and easy installation by drilling and chemical anchoring.
